### **DETAILED ACTION**

1. The drawings are objected to because the end view between Figures 2 and 3 is not numbered and the two portions of Figure 8 should be bracketed. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.
2. The disclosure is objected to because of the following informalities: In paragraph 0026, line 12 and paragraph 0027, line 5, the symbol should be replaced by the symbol for "alpha".

Appropriate correction is required.

Art Unit: 3753

3. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1, 3-5, and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Collins. The grooves shown in dotted lines in Figure 1 of Collins are read as “at least one groove”.

6. Claims 1-8 and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Inoue et al. The axial groove connected to connecting bore 12 of Inoue et al is read as “at least one groove”.

7. Claims 1 and 3-8 are further rejected under 35 U.S.C. 102(b) as being anticipated by Thor. The annular grooves connected with connecting bores 24 and 29 of Thor are read as “at least one groove”.

8. Claim 9 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
